Dear Mr. Wood:

Review of Prevention of Significant Deterioration Application PSD-97-01 NORPAC High Bright Paper

The Washington State Department of Ecology's (Ecology) Air Quality Program has reviewed the Prevention of Significant Deterioration (PSD) application for the High Bright Paper project. This application does not contain enough information to process this permit. Therefore, the application has been determined to be "INCOMPLETE".

Please submit additional information to help Ecology determine the beginning and ending dates of the contemporaneous period in order to perform a netting analysis. In addition, the National Park Service (NPS) submitted comments. Ecology will respond to two of the three comments. The remaining comment is being forwarded to you for a response. That comment is:

"Affected Emissions Units: It is unclear from either the PSD permit or Title V permit, which emissions units are covered by NORPAC I and NORPAC II. It is important that this information be clearly specified in the revised permits".

We would like to arrange a meeting with you the week of June 30, 2003 to resolve the netting issue. I will call Greg Bean to arrange this meeting.

If you have any questions, please call me at (360) 407-6896.

Sincerely,

Richard B. Hibbard, P.E.
Air Quality Program
